Cassava achieves the rare distinction of earning an "Editorial Note" on the Ph2b *preprint* that they never could get published..

researchsquare.com/article/rs-249...

\$SAVA

@cpiller @adamfeuerstein @apoorva_nyc @joewalkerWSJ

@MicrobiomDigest @RetractionWatch

Editorial Note

20 March, 2024. [In light of concerns] (<https://www.science.org/content/article/damning-fda-inspection-report-undermines-positive-trial-results-possible-alzheimer-s>) about the credibility of claims by Wang and Cassava about their Alzheimer's drug simufilam, it's important for readers to be aware of allegations of data manipulation and the ongoing U.S. criminal probe and SEC scrutiny. While the FDA has allowed ongoing trials to continue, these regulatory and investigative challenges cannot be overlooked. We encourage a balanced view on this preprint considering the potential benefits of the drug alongside the current investigations into Cassava Sciences' research practices.

Editorial notes are used to provide important context regarding the topic of a preprint or to alert readers to potential issues concerning that preprint or a downstream publication associated with it. For more information on editorial notes, [see our Editorial Policies](#).
